

Authorised by the Board: 06 December 2021

Review Date: 05 December 2022

Objectives

This Policy has the following objectives:

1. To protect the health and safety of ACM staff and visitors to ACM premises
2. To protect the health and safety of participants at ACM events
3. To mitigate the risks associated with the implementation of policies mandating COVID vaccination

Policy

1. This Policy applies regardless of

- the location of the ACM premises and
- any rules applying in the state or territory in which an ACM event is held.

2. This Policy requires that

- all staff and visitors to ACM premises must be fully vaccinated and must be ready to show proof of vaccination if required.
- regardless of the policy of the venue concerned, all participants at face to face ACM events must certify that they are fully vaccinated and to be able to show proof of their vaccination status on request.

3. The course of the COVID pandemic will require early and ongoing review of the Policy to align with changes in the public health environment, regulation and perceptions of risk. Accordingly the review date is set provisionally for 12 months, although it may be sooner.

4. This Policy is owned by the CEO who is responsible for its review as circumstances require.
